"From the dawn of civilization until 2003, humankind generated five exabytes of data. Now we produce five exabytes every two days [...] and the **pace is accelerating**"

Eric Smith

"[I]ncreasingly, scientific breakthroughs will be **powered by** advanced computing capabilities that help researchers manipulate and explore massive datasets."

Jim Gray

 \Rightarrow 4th paradigm data-intensive science/eScience is and has been a reality for quite a while in the sciences

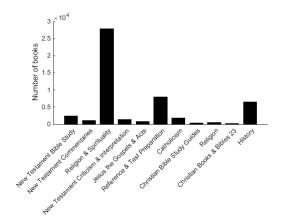

"a limited understanding of the scope, advantages, and limitations of data-intensive methods [...] have created real obstacles to the implementation of this paradigm in historical research"

Text analysis in the humanities

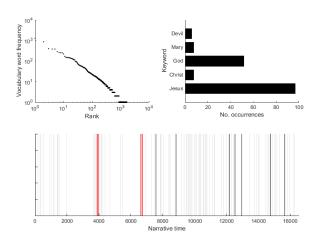

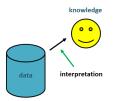

Gospel of Marc (KJV) \sim 16500 words in 16 chp. on 11 p.

Our goal

"There is no true interpretation of anything; interpretation is a vehicle in the service of human comprehension. The value of interpretation is in enabling others to fruitfully think about an idea"

Andreas Buja
